Kigali Rwanda, KG 581 St

SKILLS

- SQL/NoSQL Database Management
- System Design & Architecture
- Js/Ts Specialization (Node.js, Express.js, Nest.js, Next.js)
- IT Business Analysis
- IT Project Management
- Problem Solving & Algorithms
- Debugging & Troubleshooting
- Version Control (Git & Github)
- Project Delivery

LANGUAGES

- English: Proficient
- Kinyarwanda: Proficient

HOBBIES

- Coding
- Reading
- Researching

PROFILE

I'm a Software Engineer with proven experience in software solutions and embedded systems. Graduate of Rwanda Coding Academy's intensive program, backed by strong analytical skills and a commitment to clean, efficient code.

WORK EXPERIENCE

Senior Software Developer

TV1 – Rwanda

Sept 2025 – Present

- Developed robust software solutions using Next.js, Nest.js, PostgreSQL, delivering features that enhanced user engagement by 20%.
- Identified and resolved critical performance bottlenecks, resulting in 50% faster processing and a better user experience.
- Worked closely with product and design teams to translate requirements into efficient, maintainable code.

Full-Stack Developer & Instructor

WithinTech – Remote

March 2026 – Present

- Develop and maintain the WithinTech Learn platform (full-stack), including course generation and system architecture, while building web development curriculum.
- Teach web development across two schools, bridging technical knowledge with job opportunities for youth in the edtech space.

EDUCATION

Software Engineering & Embedded Systems

Sep 2022 – Jul 2025

Rwanda Coding Academy, Nyabihu

Completed rigorous 3-year specialized training in software development lifecycle, embedded programming, and system integration through hands-on projects.

Gained industry-relevant skills in coding best practices, real-world problem-solving, and technical innovation.

General Studies - Jan 2019 – Jul 2022

Groupe Scolaire St. Bernadette Save, Gisagara
